Work Information (*site; position; location; etc*)

Please check: I want     clinical supervision     consultation

**Clinical supervision** occurs for licensure. Erin Ballard is able to provide supervision for LMFTA's and LCMHCA's. The clinical supervisor has an evaluative role and confirms for the licensure board that the candidate is of high moral and ethical integrity and has the basic skills required for the license. This means that the relationship between the supervisor and the supervisee is hierarchical because the supervisor has some power over the supervisee. The supervisor also shares some liability for the welfare of the supervisee's clients.

**Consultation** on the other hand does not require evaluation processes and is meant to aid the already licensed clinician in enhancing their skills in an area that Erin Ballard is proficient in. The consultee holds all the liability for the welfare of his or her clients. Erin remains a gatekeeper to the field and consultations will include attunement to ethical integrity.

Please describe below the reason you are requesting clinical supervision or consultation at this time:

Does your employer know that you are requesting clinical supervision/consultation from me and is this permitted by your on-site administrative/clinical supervisor? \_\_\_\_\_

Preferred contact method and available dates/times for complimentary consultation:
